Hanwha Techwin Unveils New Touchless

Intercom Station TID-600R

- ◇ A unique, touchless call system as an essential COVID-19 preventive measure
- ◇ Offers best-in-class images with a 2MP sensor with Hanwha Techwin's signature WDR (wide dynamic range) and low light performance
- ◇ A wide 180° field of view and IR make the station applicable for various business areas

Global security company Hanwha Techwin launched a new touchless network intercom station TID-600R. With the launch of TID-600R, Hanwha Techwin further expands its product portfolio.

The TID-600R Network Intercom Station features a 2MP sensor with Hanwha Techwin's signature WDR (wide dynamic range) and low light performance for best-in-class images. The lens offers a wide 180° field of view while IR provides up to 16 feet of illumination from the station at night. The built-in speaker and microphone provide excellent call clarity with up to 85dB of volume at 20 inches. The TID-600R features a unique, touchless call system where users simply present their palm within six inches of the station to initiate a call. With full support for SIP 2.0, the station can easily integrate with a wide variety of VMS, access control, SIP phones or PBX servers.

The intercom station also features echo cancellation, noise reduction and a built-in tamper switch and relay for stand along door access. Users can program audio messages to be played automatically when the device is approached or when a call is initiated. A range of included Hanwha Techwin analytics such as line crossing, loitering, appear/disappear, and more are included. The slim 1.93"(W) x 6.50"(H) x 1.89"(D) form factor allows easy installation on a door mullion or other surfaces. Tilt mount, flush mount and white/dark grey

colors are available.

“In this age of COVID-19 and the awareness of high-touch surfaces, having a touchless intercom station was important to our customers,” said an official at Hanwha Techwin. “The slim form factor and SIP compatibility, combined with our industry leading imaging technology, raises the bar for networks intercom stations.”
